

# MCM FLEX STONE

# FLEXIBLE MCM STONE

## WHAT IS FLEXIBLE MCM STONE?

Modified Inorganic Powder Composite (MCM) is an ultra-thin, lightweight cladding material — only 2-6mm thick and 3-8 kg/m<sup>2</sup>. Fireproof, waterproof, and eco-friendly, it is engineered to perform in Qatar's demanding climate while delivering a premium architectural finish.

# MCM TRAVERTINE FLEXIBLE STONE:

SPECIFICATIONS • AVAILABILITY • APPLICATION GUIDANCE • INSTALLATION TIPS

## WHAT IS MCM?

(Modified Clay Materials)

-  **LIGHTWEIGHT**  
(4-6 kg/m²)
-  **FLEXIBLE**  
(Wraps curves & corners)
-  **ECO-FRIENDLY**  
(Low-carbon production)
-  **DURABLE & WEATHER RESISTANT**

## AVAILABLE TRAVERTINE FINISHES

Open Pores | Filled & Honed | Cross-Cut  
e.g., 600mm x 1200mm, 300mm x 600mm

## INSTALLATION GUIDE & TIPS

 PROFESSIONAL INSTALL RECOMMENDED

-  **1. SURFACE PREP**  
Clean, dry substrate
-  **2. APPLY ADHESIVE**  
Special flexible stone glue
-  **3. APPLY PANELS**  
Press and roll for full contact
-  **4. CUTTING**  
Easy cutting with utility knife
-  **5. FINISHING**  
Seal joints if needed

## TECHNICAL SPECIFICATIONS

|                    |             |
|--------------------|-------------|
| THICKNESS:         | 2mm - 4mm   |
| WATER ABSORPTION:  | <3%         |
| FIRE RATING:       | Class A2/B1 |
| FLEXURAL STRENGTH: | HIGH        |
| UV RESISTANCE:     | EXCELLENT   |
| LIFESPAN:          | >50 YEARS   |

Lightweight Advantage

## OPTIMAL USE CASES

-  EXTERIOR FACADE
  -  INTERIOR WALLS & FEATURES
  -  CURVED FEATURES
  -  CURVED COLUMNS
